

Portfolio Factsheet

Adventurous Core V21A

Aviva Factsheet

Portfolio Strategy and Key Features

Portfolio Objective:

This portfolio looks to incorporate both a long-term strategy and an industry recognised benchmark to create a portfolio that does not need to be adjusted to short term market events. This strategy takes a 'buy and hold' approach based around a standard benchmark with the aim of generating slow, yet constant, long term growth.

Benchmark:

MSCI PIMFA Private Investor Growth Index

Attitude to Risk:

Client Suitability:

Suitable for Clients who:

- Do not want short term market volatility affecting their investments
- Wish to be contacted annually regarding investment decisions
- Wish to have exposure to growth-based markets

Portfolio Breakdown

Summary	
Number of Funds	21
Total Investment Charges	0.82%

Risk Warnings

Risk Warnings

1. Emerging markets. The portfolio may invest in emerging markets. There is an increased chance of political and economic instability with less reliable custody, dealing and settlement arrangements. The market(s) can be less liquid. If a fund investing in markets is affected by currency exchange rates, the investment could either increase or decrease. These investments, therefore, carry more risk.
2. Exchange rate. The portfolio may invest in securities denominated in currencies that are different to the fund currency. The value of investments and any income from them may, therefore, decrease or increase as a result of changes in exchange rates between currencies.
3. Geared investments. The portfolio may include geared investments. Funds which focus on geared investments such as warrants, or options carry a higher degree of risk than other equity investments because of the risk of the underlying investments. It is possible that the fund may suffer sudden and large falls in value so that the short fall on cancellation, or the loss of the realisation on the investment could be very high and could even equal the amount invested, in which case you would get nothing back.
4. Property funds. The portfolio may invest directly in physical property and there may be delays in completing your instruction to sell. This could affect you, for example when you are close to retirement, as it may be difficult to sell the units you hold in such funds. Any decision to invest in physical property should be carefully considered in line with your planned retirement goals. The value of physical property is generally a matter of a valuer's opinion rather than fact.
5. Sector specific funds. The portfolio invests in specific sectors. Funds which invest in specific sectors may carry more risk than those spread across a number of different sectors. They may assume higher risk, as markets/sectors can be more volatile. In particular, gold, technology funds and other focused funds can suffer as the underlying stocks can be more volatile and less liquid.
6. Smaller companies. The portfolio invests in smaller companies. Smaller companies' shares can be more volatile and less liquid than larger companies' shares, so smaller company funds can carry more risk.
